Health, Safety and Wellbeing Policy
2022-2023

Guidance

Under the **Health and Safety at Work Act 1974**, every organisation that employs five or more people must have a written Health and Safety Policy. It is important that individual sites have their own site specific policy so that roles and responsibilities are clearly understood.

Your Health and Safety Policy will state your intention to work safely and should be a useful tool to help you achieve its objectives.

This booklet will allow you to produce a policy that is tailored to the way you work. Please remember that the list of health and safety issues shown in this document is not exhaustive; add any others that are relevant to your work and the premises.

This policy should also cross-refer to any other relevant supporting documentation that may be available in your School

Making the Policy Work

Everyone working in your School, from the Headteacher / Senior Manager to new members of staff has their own role and responsibilities. Involve people that work with you so that everyone understands their responsibilities and can act on them. It is a legal requirement to communicate your safety policy to all employees.

Communication and Consultation

There is a legal obligation placed upon the employer to consult with appointed representatives on health and safety issues. If there is no formally appointed representative you still must have procedures in place to consult with staff on health and safety matters. This can be done either by consulting with employees as individuals or through a representative who has been elected by all staff on site. Any elected health and safety representative is entitled to reasonable time off, with pay, to enable them to carry out their role.

You will already have adequate procedures in place for consulting with staff; these may include a formal health and safety committee (comprising of Trade Union and Management representatives), putting health and safety as an agenda item at formal staff meetings, team meetings, discussions during performance management, appraisals and one to one's etc. Where arrangements are already in place, these should be reviewed to ensure that they remain fit for purpose. Where no formal arrangements exist, you should ensure that appropriate means for consulting with staff are put into place.

Help and Advice

Advice on any health and safety matter can be obtained through the Health and Safety Team on 0114 2734082 or via email healthandsafety@sheffield.gov.uk

Policy Statement

The Headteacher, Governors and staff at our School are committed to providing high standards of health and safety for all users of the School.

As a school, our educational priorities aim to:-

- encourage all pupils to achieve their full academic and social potential;
- provide pupils with the skills and experience which will ensure that the widest possible range of choices are open to them in their future lives;
- provide a sense of community in which individuals feel valued and are actively encouraged to value, respect and help others;
- create an atmosphere in which students enjoy and take pride in their achievements.

These educational and social priorities can only be fully realised within a physical environment that is both a safe and healthy place to work. This in turn can only be brought about by the dedicated co-operation of all within the school. Health and safety at this school is an area where Governors, the Headteacher, staff, safety representatives and parents share common objectives.

It is vital that we all understand each other's duties, functions and responsibilities as well as our own because it is only by the co-operation and teamwork of everyone involved that health and safety objectives in school can be achieved.

Our Health, Safety & Wellbeing Objectives

To successfully implement its statement of intent of “Taking Time” for Health, Safety & Wellbeing – our School will:-

- a) Provide and maintain a safe and healthy environment for all
- b) Ensure individual acceptance of health, safety and wellbeing as an integral part of all work activities
- c) Ensure that employees, pupils, visitors and others are provided with the necessary information, instruction, training and supervision to enable them to carry out their health, safety and wellbeing responsibilities
- d) Engage employees in health, safety and wellbeing matters to ensure understanding and compliance
- e) Fulfil, as a minimum, its statutory and common law duty of care
- f) Apply sensible and proportionate risk management practices to health and safety matters
- g) Aim to be in the upper quartile, both Regionally and Nationally for fewer accidents/ incidents and less occupational ill health
- h) Ensure that a positive health, safety, and wellbeing culture is in place. A positive culture has three key elements:
 - working practices and rules for effectively controlling hazards
 - A positive attitude towards risk management and compliance with the control processes
 - The capacity to learn from accidents, near misses and safety performance indicators and bring about continual improvement.

This safety policy will be regularly reviewed and updated

School Health and Safety Representative

The Governing Body and Headteacher recognise the role of Safety Representatives. Safety Representatives will be allowed appropriate paid time off to enable them to fulfil their duties.

We communicate and consult with safety representatives on a regular basis about health and safety matters and offer facilities to enable them to investigate workplace accidents, employee complaints and to carry out periodic health and safety inspections.

General Arrangements to Keep People Safe

1 Risk Assessment

Risk Assessments are a legal requirement mainly under the **Management of Health and Safety at Work Regulations 1999**, although most health and safety legislation requires a risk assessment approach.

All of our Risk Assessments are recorded. We use the Generic Risk Assessment booklets as a starting point but, where there are no generic assessments we carry out our own assessments using the blank assessment form which can be found in the Health Safety and Risk area of 365 Sharepoint). Risks are assessed periodically (usually on an annual basis), following an accident, on the introduction of any new process/equipment and also any change in circumstances.

We share the findings of our risk assessments with all members of staff

Risk assessments are usually kept:

Document	Location
Fire Risk Assessment	Fire log book – main school office
Generic Premises Risk Assessment	Premises log book – Liz Smith office
Foundation Stage Risk Assessment	Premises log book – Liz Smith Office
Educational Visits Risk Assessments	Office 365 – staff share/risk assessments
Hazardous Substances Risk Assessments	Risk Assessment file – main school office
Task / activity based Risk Assessments	Office 365 – staff share/risk assessments

Shown below are the name(s) of the staff assisting with the assessment process as well as details on when they will be carried out and our updating systems.

The following people assist with the assessment process for their individual area of work:

Name	Area of responsibility
Liz Smith	Fire, generic & EYFS RA, first aid, accident reporting
Daniel Green	COSHH, asbestos, legionella, gas, electricity
Hannan Mohammed	Educational visit and task/activity/subject specific, staff wellbeing and stress

NB It is the Headteachers responsibility to ensure that risk assessments are carried out. However the Headteacher may delegate the function or request the assistance of competent staff in carrying out a risk assessment.

2 Fire

An outbreak of fire in a school can be extremely serious. The **Regulatory Reform (Fire Safety) Order 2005** makes it a legal requirement for each building to have an up to date fire risk assessment. Our Fire Risk assessment identifies all sources of heat with the potential to cause fire e.g. gas heaters, Bunsen burners, cookers etc. and it also consider the storage of combustible materials.

When our school requires painting, only paints providing a flame retardant surface will be used in high risk areas (assembly halls, means of escape, staircases, areas where there is an added fire risk etc).

Ongoing monitoring is carried out to ensure that combustible materials (liquids, solids or gases) do not come into contact with sources of heat.

Internal fire doors are kept closed to stop fire spreading. Hydraulic door closers are checked regularly and maintained as necessary to ensure correct operation (damage to these closers is very common in schools).

All documentation relating to fire safety is kept:

4 Asbestos

Asbestos is a naturally occurring mineral that has been used for many years in the construction of buildings and in many products. It was used mainly because of its fire proofing and insulation qualities.

We have got an Asbestos Management survey on site and this has been shared with all members of staff. All staff are aware that as long as the asbestos is in good condition and is not disturbed or damaged there is no risk to individuals. However, if it becomes damaged or disturbed, it can become a danger to health as asbestos fibres can become released into the atmosphere and therefore people can inhale the fibres.

All documentation relating to asbestos is kept:

5. Legionella Risk Management

Legionnaires' disease is a type of pneumonia. It is an uncommon, but serious disease.

People can catch Legionnaires disease by inhaling small droplets of water suspended in the air which contain the Legionella bacterium.

Legionnaires' disease does not spread from person to person.

We have had a full Legionella audit of the school which has been shared with all members of staff. Key members of staff have a role to play in ensuring that the findings of the audit are actioned and making sure that regular monitoring is carried out on site

7 First Aid

This school will follow the statutory requirement for first aid equipment and provide suitably trained first aid staff. Where there are young children on site i.e. Nursery's / Breakfast and after school clubs, key members of staff hold an additional paediatric first aid certificate. NB There is sufficient paediatric first aiders to ensure cover on all off site activities involving young children.

Our school risk assessment identifies the actual number of first aiders required.

(As a rough guide the recommendation is 1 first aider for every 100 people on site. This is usually made up of 2 fully qualified first aiders, with the remainder holding the 1 day emergency first aid certificate)

The visual checking, maintenance and repair of portable and transportable electrical equipment is the responsibility of the school.

Fixed installations i.e. sockets, light fittings and general wiring throughout the school will be tested at least every five years by a competent electrician. (This is carried out automatically for those that subscribe to the **T & FM Servicing Package**).
